

DENT-GAS

PORTABLE OXYGEN

KIT #1 - (our most popular!) \$265.00

Uses a leased "E" size oxygen tank available from your gas supplier.

Includes:

- 0 to 15 litre per minute (lpm) flow regulator
- cylinder cart, disposable mask and tubing
- cylinder wrench

Leasing your tank makes it much easier to have the tank replaced or refilled. Most gas suppliers charge \$45.00 to \$50.00 a year for this annual lease and a full tank (refill) costs about \$25.00 to \$35.00.

KIT #2 - (includes the tank!) \$465.00

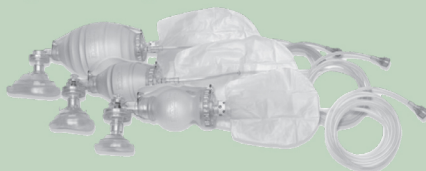

Same as above but includes an "E" size aluminum cylinder filled.

More cost effective over a period of time because there are no annual lease charges but there are the following considerations:

- Most oxygen suppliers will not refill customer owned cylinders.
- Sometimes the oxygen supplier will pick up your shiny new tank and return something that looks as if it's been in use for 20 years (not your tank)
- Aluminum oxygen cylinders should be hydro-statically tested every seven years at a cost of between \$150.00 to \$200.00.

Resuscitation Bag - Single Patient Use - Adult or Child \$65.00
